Tetrosyl

The **complete refinishing** solution

Tetrosyl has celebrated **over 50 years in the Refinish business,** from solvent and cellulose in the early days, through to 2 pack acrylic and polyester today, **for 2011 our technologically advanced waterborne paint meets the demands of the VRG market.**

The introduction of the **aqua-t waterborne colour system** was perfectly timed to comply with the **2007 VOC emissions legislation** and provides bodyshops with an economic, quality solution to becoming compliant with minimum disruption.

The trade entered the new compliant age and Tetrosyl responded with a new **£2m production facility, advanced technology, innovative packaging and ease of application,** all designed to support the trade with a compliant range.

This 2011 Refinish programme provides **complete range solutions** for the modern bodyshop, taking Tetrosyl full circle - once again focusing on the needs of the industry.
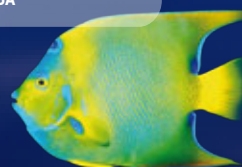

Tetrosyl

Contents & buyers guide

Solid colours

aqua-t solids are manufactured by employing the latest technology which provides high chroma from pigments, maximises colour fastness & durability, and ensures a deep lustrous colour base.

Additional products

The aqua-t cabinet maintains the product at an ambient temperature within the optimum range for waterborne paint (5 to 20 degrees) to ensure that the paint remains perfectly workable. The aqua-t warming cabinet easily accommodates Tetrosyl's complete range of solids, metallics, pearlescents and xirallics mixing bases in 500ml, 1L and 2.5L.

TIPS

Useful tips to aid a painless move to compliancy

- Invest in a new spray gun, designed with compliancy in mind

- Check your psi – compliant product is different to MS
- Check your mixing ratios – these also may be different
- Comply carefully to drying times between coats and before baking
- Follow the Application Chart carefully

Etch Primer

A chromate free, fast drying etch primer designed especially for use on the repair of rub through areas and on substrates such as galvanised steel & aluminium.
Etch primer does not require sanding, overcoat with primer before colour application.

BODYFILLER

Colour Cure Bodyfillers have been specially designed to complement most substrates plus our compliant aqua-t colour finish. All are supplied with the correct amount of hardener.

2K Bodyfiller

A 2-pack premium grade bodyfiller suitable for application to numerous substrates including GRP. Sets in minutes, creating an easy to sand, tough and smooth repair.

2K Fibrofil

A tough bodyfiller reinforced with glass fibre to give a solid and vibration resistant repair. Ideal for bridging and filling holes in metal and glass fibre surfaces.

Specialist Bodyfillers

Each Bodyfiller has been carefully tinted to ensure correct product usage – see table.

2K Stopper

A fine surface pinhole free polyester stopper ideal for minor repairs, dents and scratches. Sets in minutes, creating an easy to sand, tough and smooth repair.
